

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1. (Currently Amended) A method of predicting and influencing the performance of an organization consisting essentially of the steps of:

initiating a survey with an independent third party;

sending a first correspondence from the independent third party to a member of the organization;

providing an independent third party web site;

asking the member of the organization ~~one question related to~~ self rate the member's pulse energy level at the web site;

accessing the independent third party's web site by the member of the organization and responding to the one question related to the member's pulse with one pulse answer;

sending the member's pulse answer to a database; and

analyzing the pulse answer by the independent third party.

2. (Currently Amended) The method of Claim 1 further comprising the step of the independent third party providing advice to the organization on how to respond to the member's pulse energy level answer.

3. (Currently Amended) The method of Claim 1 further comprising the steps of:

preparing a report from the ~~pulse~~ energy level answers;
sending the report to the web site;
notifying the organization that a report is available;
retrieving the report by the organization at the independent third party's web site; and
sending a second correspondence from the independent third party to the member of the organization.

4. (Currently Amended) The method of Claim 3 wherein sending a report includes the step of calculating changes in a member's ~~pulse~~ energy level.

5. (Currently Amended) The method of Claim 3 wherein sending a report includes the step of determining whether a significant change has occurred to the ~~pulse~~ energy level of the organization.

6. (Currently Amended) The method of Claim 3 wherein sending a report includes the step of determining whether a significant change has occurred in the ~~pulse~~ energy level of the member.

7. (Currently Amended) The method of Claim 3 wherein sending a report includes the step of providing a set of best possible responses to the member's pulse energy level answer.

8. (Original) The method of Claim 3 wherein sending a report includes the step of editing responses to remove a member's identity.

9. (Currently Amended) The method of Claim 3 wherein sending a report includes the step of categorizing ~~pulse answers~~ energy level answer.

10. (Currently Amended) The method of Claim 9 wherein categorizing pulse energy level answers includes using an expert system.

11. (Original) The method of Claim 3 further including the step of the second party providing a response to the member of the organization by forwarding it through the independent third party.

12. (Original) The method of Claim 11 further including the step of the independent third party contacting the member of the organization to let them know a response has been provided.

13. (Original) The method of Claim 1 further comprising the step of providing a computer system having a member interface, an organization interface, and an independent third party interface.

14. (Previously Presented) A method of measuring the pulse of an individual consisting essentially of the steps of:

providing a web site including one question related to the individual's pulse which correlates to the individual's pace of work, efficiency of work, and job satisfaction;

sending a first electronic message requesting that the individual answer the question on the web site; and

recording a first response to said question.

15. (Original) The method of Claim 14 further comprising the step of sending at least a second electronic message requesting the individual participate in a subsequent survey, and comparing said first response to said first survey to said subsequent response to determine changes in the response to the individual over time.

16. (Original) The method of Claim 14 wherein providing a web site further includes the step of providing a web site run by a third party, said third party keeping said responses secure.

17. (Original) The method of Claim 16 further comprising the step of providing said first response to a second party.

18. (Original) The method of Claim 17 wherein either said second party or said third party forwards a second response to said web site and said first party can access said second response.

19. (Previously Presented) The method of Claim 16 wherein said individual and said second party are anonymous to each other, in that responses from said individual are not identified by name and are aggregated with others' responses.

20. (Original) The method of Claim 19 wherein said third party may or may not know the identity of said individual and said second party.

21. (Original) The method of Claim 19 wherein said third party provides said second party best responses to said first response.

22. (Original) The method of Claim 14 further comprising the step of sending an electronic message to any sub-set of individuals within an organizational structure.

23. (Previously Presented) The method of Claim 22 wherein said third party compiles responses to said electronic message and forwards the compiled responses to at least one second individual within an organizational structure.

24. (Original) The method of Claim 17 further comprising the step of providing an expert system.

25. (Original) The method of Claim 24 further comprising the steps of said expert system providing analysis and best responses to said first party or to said second party.

26. (Original) The method of Claim 14 comprising the step of producing a report based upon said first response and training individuals using said report.

27. (Previously Presented) A system operable on one or more computers for generating a pulse of an organization, said system consisting essentially of:

 a database operable to store survey data comprising at least one response to a question related to the pulse of individuals within the organization, wherein the response to the question represents the pace of work, efficiency at work, and job satisfaction within the organization and the database is further operable to store comments related to issues affecting performance;

 a real-time organizational module coupled to said database and operable to request individuals within the organization to provide said survey data, the real-time organizational module operable to electronically communicate with the individuals within said organization, said real-time organizational module further being capable of segmenting said survey data into a plurality of survey data segments; and

 calculating an organizational energy variable based upon the data in the plurality of data segments.

28. (Original) The system of Claim 27 further comprising a data set of best responses.

29. (Original) The system of Claim 27 wherein the said real-time organizational module is capable of forwarding said individual's survey data to a second party.

30. (Original) The system of Claim 28 wherein said real-time organizational module is capable of providing said best responses to said second party.

31. (Original) The system of Claim 29 wherein said real-time organizational module is capable of providing second responses from said second party to said individuals while said individual remains anonymous to said second party.

32. (Original) The system of Claim 29 wherein said real-time organizational module is capable of providing direction to information related to issues of interest to the organization.

33. (Original) The system of Claim 29 wherein said real-time organizational module is an expert system.
